America Brushes Up Jan 31 2020 This excursion into American cultural history looks at the toothpaste and toothbrush industries from 1900 to 2008. During these years, America moved from cleaning their teeth mostly with homemade powders to using an enormous array of brands, often applied with an electric toothbrush. From early 20th century products like Forhan's (which "cured" pyorrhea) to the whiteners of the 1920s (which unfortunately also removed tooth enamel), and from paste that eliminated "that clinging film" and to copywriters who "wondered where the yellow went," the history of toothpaste has long been a testament to the power of misleading advertising. Interrupting a steady flow of hyperbole was the one true wonder ingredient—fluoride, which enabled Crest to be for decades America's top-selling brand.

Genius & Anxiety Dec 12 2020 This lively chronicle of the years 1847–1947—the century when the Jewish people changed how we see the world—is “[a] thrilling and tragic history...especially good on the ironies and chain-reaction intimacies that make a people and a past” (The Wall Street Journal). In a hundred-year period, a handful of men and women changed the world. Many of them are well known—Marx, Freud, Proust, Einstein, Kafka. Others have vanished from collective memory despite their enduring importance in our daily lives. Without Karl Landsteiner, for instance, there would be no blood transfusions or major surgery. Without Paul Ehrlich, no chemotherapy. Without Siegfried Marcus, no motor car. Without Rosalind Franklin, genetic science would look very different. Without Fritz Haber, there would not be enough food to sustain life on earth. What do these visionaries have in common? They all had Jewish origins. They all had a gift for thinking in wholly original, even earth-shattering ways. In 1847, the Jewish people made up less than 0.25% of the world's population, and yet they saw what others could not. How? Why? Norman Lebrecht has devoted half of his life to pondering and researching the mindset of the Jewish intellectuals, writers, scientists, and thinkers who turned the tides of history and shaped the world today as we know it. In *Genius & Anxiety*, Lebrecht begins with the Communist Manifesto in 1847 and ends in 1947, when Israel was founded. This robust, magnificent, beautifully designed volume is “an urgent and moving history” (The Spectator, UK) and a celebration of Jewish genius and contribution.

How Law Works: Collected Articles and New Essays Mar 03 2020 This book chronicles developments in legal practice, intellectual property, and privacy law from the dawn of the digital age to today's world of social media and cloud technologies. Part autobiography, part legal history, and part philosophy of law, this volume explores a variety of subjects including the nature of legal reasoning, property, privacy, and personal identity. In addition, it tackles larger issues grounded on meticulous research into the legal protection for computer software, the mechanics of software licensing, the use of intellectual property rights in secured lending and trademark selection, registration and maintenance. Hennessy weaves through the complexity of these issues and examines how the promises of the early digital age in the 20th century declined into the rampant factionalism, nationalism, and terrorism of the early 21st century. An indispensable resource for anyone studying the emergence of intellectual property rights as a cornerstone of the modern economy, this book also serves as a foundational reference tool for professors, students, and practitioners of intellectual property. Furthermore, the valuable information contained within its pages; from the very basics of computer software protection to the intricacies of negotiation strategy for indemnification clauses in intellectual property licenses, warrants its place on the library shelves of every practitioner of intellectual property and privacy law and on the reading list of every intellectual property, privacy and jurisprudence course.

How do you know if your idea is good or if consumers would pay for it? *Entrepreneurial Valuation* brings to life cutting-edge research on value theory, challenging the prevailing wisdom that entrepreneurial valuation is as simple as asking consumers what they want. Oral Health-related Quality of Life Nov 22 2021 ABSTRACT: Helping patients achieve an optimal quality of life through patient-centered treatment planning should be the ultimate goal of all oral health care providers. This text presents quality-of-life research from various fields, including psychology, public health, and general health care; discusses how a patient-centered approach can be applied to basic oral and craniofacial research, clinical dental practice, community dental health issues, and dental education; and addresses how oral health-related quality of life relates to treating and understanding different patient populations, such as children with special needs, medically compromised patients, patients with oral cancer, and patients with chronic facial pain. Also discussed is how factors such as race/ethnicity, gender, and age can affect oral health-related quality-of-life concerns and treatment strategies.
