founding family, brought up with rather stringent expectations, but right now she is a widow trying to raise a son she doesn't understand. If Last Stand had royalty, in Sean's book it would be elegant Elena. He's willing to help her son as he had been helped, but being that close to Elena scares him to death since he's been in awe of her for years. Elena is impressed both with the way Sean gets through to her son, and with his appreciation for the Christmas customs of her culture as much as his own. Their perceptions of each other shift, but will the passion that strikes between them be enough to

overcome their perceptions of themselves?
How to Be a Race Engineer Sep 23 2019 This series of books gives you the knowledge to become a successful Race Engineer. There are many good engineering books, but none have been written specifically for someone engineering a Race Car. Whether you are fresh out of university or a club racer wanting to know more; this series is for you. This collection of books has come about for many reasons. My fascination with the technical side of motorsport, the desire to go faster, the desire to learn, and a most importantly to help

aspiring Race Engineers. The desire to learn how make machines go faster started as a 10 year old with my first Moto X bike. I kept wondering why the works bikes looked so different to mine in the magazines. Trouble was there were no books to show me how to turn my bike into a works replica. So, I just pulled the forks and dampers apart and tried different oil, valving and springs. Eventually some of the modifications proved successful, but I always thought it would have been so much easier if I had a guide book. I was in the same boat when I started racing my first formula ford. Having to prepare

the car myself as well as drive it and engineer it on race day. None of my fellow competitors were going to tell me how to set up the car. And I just couldn't find information that was race engineering specific. I also spent a lot of money with suspension and race prep "experts" who I found out later really did not know what they were doing. When I started working as a Data Engineer in professional motorsport and had to troll through two, floor to ceiling book shelves full of books to find answers to problems. Why can't there be just one book with what a race engineer

needs to know I used to think. And finally, the thing that got me writing was working with new Data / Race Engineers. Most were intelligent, hardworking and eager to learn. However, they often came into the team without knowing or understanding what they needed to do as a Race Engineer. I decided to write the first volume on shock absorbers for several reasons. Shock absorbers are the least understood of all components in a race car. I see this nearly every day as part of my business is tuning shock absorbers for customers with many different types of race

cars. The most important thing you can take from this book is that shock absorbers are not a black art. Like any mechanical component or any machine in its dynamic state it all comes back to engineering from first principles. Yes, experience does play its part to get the most out of your shocks and give the feel driver wants. But, if you start off following the basic principles laid out in this book, you will soon have your dampers in the ball park.

business you are a danger to yourself and your account. You will need to develop mental toughness if you wish to compete in the live markets against the best traders in the world. The good news is you can do it; the even better news is that you can do it fairly quickly if you follow the suggestions in this book. There is really no easy way to do it honestly, there is a certain progression of steps all new traders must go through to be able to drive their own money train. Some of the first steps are to study and learn money management, gain a hold on your own trading psychology, and compose a

rules based trading amongst others. There are no short cuts and what I just said to study and learn can take quite a while. It all depends on you and how much time and effort you are willing to put in to learn what needs to be known to be a successful market participant. You are in control of your investing and trading business and once you have your psychology and emotions under control you will achieve consistency and be able to make as much money in the live markets as you desire. There is also a lot of fear involved in trading and as a professional investor and trader you must be able to pull the trigger on a

position and do it without hesitation or fear. When traders make a mistake in their analysis, which causes them to take a loss, they can develop a fear of being wrong all the time. This can psychologically prevent them from “pulling the trigger” when they need to. There are some suggestions in this book to help you overcome the fear of pulling the trigger in the live market.

Jun 13 2021 This is a biography of Bill Kaysing (1922-2005), author of the important book "We never went to the Moon". It tells the whole story of a writer with a very unusual ?alternative lifestyle.? After working for Rocketdyne, Kaysing became a whistleblower regarding the Apollo Space Programme. He completely changed his lifestyle ? to become a

?nonconformist? and began to live a life which many free-thinkers might envy. He lived outside the constraints of the society that most of the rest of us live in. While living in California, he became quite infamous - all over the world as the "father" of the controversial theory of the Moon landing hoax. His extraordinary story is one that gives a fascinating glimpse into certain parts of American society and one that will ?shake the conscience? of any reader who is not aware of the machinations of US corporations and government.

Car Buying Guide

Oct 05 2020 ☐☐ Buy the Paperback version of this book and get the eBook version included for FREE ☐☐ If you are planning on buying a car, I have no doubt that you are excited and that you can't wait to start racking up the miles in your new car. However, buying a car is a high-ticket purchase and it is very wise to know how to approach such a big purchase so that you get what you want while also getting the best price without unneeded extra costs. That is what this book is all about. I don't know anyone who looks forward to interacting with a car salesperson, or

any salesperson.

However, it is one of the things that inevitably have to be dealt with. In the past, car salespeople had the edge because there wasn't a lot of information out there which may, otherwise, enable the customer to have leverage in the negotiation process so that they don't get taken advantage of. However, we live in a different time in which information is abundant and ignorance is a choice. The tricks that car salespeople use are no longer a secret. For the price of a coffee, you can purchase information, such as the one within this book, that can help you to avoid paying thousands of

extra dollars in the process of buying a car. Imagine what you could do with that extra cash. In this book, you can expect to learn about: -Avoiding dealership scams - Inspecting a car before buying it - How to not to fall for the tricks of car salespeople -Buying a car in ways other than through a car dealership -And much more! If you are ready to get through the process of buying a car as fast as possible and with minimum hassle, so that you can get to the fun part, which is the driving itself, then scrolling over to the BUY button and clicking it is the first step towards that.
