Royal Navy Submarine Nov 10 2020 Launched in 1945 and commissioned two years later, submarine HMS Alliance was built for service with the Royal Navy in the Far East. Alliance had a long and distinguished career of more than 28 years that took her all over the world. Today, Alliance is the centrepiece at the Royal Navy Submarine Museum, Gosport, where the submarine experience is brought to life by tours around the boat. Former submariner and historian Peter Goodwin gives Alliance the Haynes Manual treatment, examining in detail her construction and restoration, and describing what it was like to live, work and go to war in a submarine.

Subsmash Oct 22 2021 In April 1951, the Affray was on a routine peacetime simulated war patrol in the English Channel. She radioed her last position at 21.15hrs on 16 April - and preparing to dive. This was the last signal ever received from the submarine. Fifty-six years later, Alan Gallop uses previously top secret documents, interviews with experts and contemporary news sources to explore how and why Affray became the last British submarine lost at sea.

Moral Stealth Nov 30 2019 A psychiatrist writes a letter to a journal explaining his decision to marry a former patient. Another psychiatrist confides that most of his friends are ex-patients. Both practitioners felt they had to defend their behavior, but psychoanalyst Arnold Goldberg couldn't pinpoint the reason why. What was wrong about the analysts' actions? In *Moral Stealth*, Goldberg explores and explains that problem of "correct behavior." He demonstrates that the inflated and official expectations that are part of an analyst's training—that therapists be universally curious, hopeful, kind, and purposeful, for example—are often of less help than simple empathy amid the ambiguous morality of actual patient interactions. Being a good therapist and being a good person, he argues, are not necessarily the same. Drawing on case studies from his own practice and from the experiences of others, as well as on philosophers such as John Dewey, Slavoj Žižek, and Jürgen Habermas, Goldberg breaks new ground and leads the way for therapists to understand the relationship between private morality and clinical practice.

Lockheed F-117 Nighthawk 'Stealth Fighter' Manual Nov 03 2022 By the time the so-called 'Stealth Fighter' was acknowledged to the world in November 1988 it had already been in service with the USAF for five years. A product of the Lockheed Skunk Works, the F-117 Nighthawk was the first operational aircraft to be designed around stealth technology. Although popularly known as the stealth fighter it was actually a ground-attack aircraft.

The Book of Ninja Mar 03 2020 The Book of Ninja, the ultimate ninjutsu manual, was penned in 1676 by a ninja known as Fujibayashi. Born in the post-civil war era of Japan, Fujibayashi collected and combined information from the ninja clans of Iga - regarded to be the homeland of the ninja - and compiled it into an authoritative book. Known as *The Banshukai*, this book has now been translated into English by the Historical Ninjutsu Research Team. It is widely considered to be the 'bible' of 'ninjutsu', the arts of the ninja. The Book of Ninja begins with an in-depth introduction to the history of Fujibayashi's scripture. Then the teachings themselves, appealingly rendered in this translation, take us into the secrets of guerilla warfare and espionage. We learn how to become the ultimate spy, whether through a network of spies or by hiding in plain sight. Through the stealth and concealment tactics of night-time infiltration and through weapon and tool building skills, as well as mission planning, we can learn much both about warfare and about adopting the right mindset for tackling our own inner and outer enemies. Adding to the mix for the spycraft lover, there are sections on capturing criminals, performing night raids, making secret codes and signs, and even techniques for predicting the weather and using an esoteric Buddhist system of divination. An exciting and engaging tome of lost knowledge, *The Book of the Ninja* is the final say in the world of the ninja and the ultimate classic for samurai and ninja enthusiasts alike.

New York to Hong Kong in Two Hours! the Future of Aviation Jun 29 2022 A new superfast space plane that skirts the edge of space, inbound on a two-hour jaunt to Hong Kong, collides with a satellite. Metals groan as if in pain. The aircraft slowly overturns. Suddenly the emergency floor lights extinguish. All manner of objects bounce and sail through the cabin. In the darkness some debris strikes passengers. Screams of injury join shouts of terror. Various tourists claw at their restraints, freed, they fall away into darkness. Bounding travelers kick, and swing their arms; scratching the bodies of other sightseers. Indescribable howls fill the fuselage. Deafening, hysterical shrieks eject from every throat. One, clear, horrified voice rises above the others. "GOD! GOD. OH GOD." The terrified screamer could be male or female, extreme fear reshapes the shouter's larynx. This is the ultimate roller-coaster ride. The grinding metal begins to sound musical like the screech of an electric guitar. The space plane lurches into the vastness of the stellar realm. With fuel exhausted and onboard life-gases spewing from its hull, the space plane drifts and twists through space. The vacationer's eyes bulge as they await catastrophe. Passengers draw lots to determine who will be among those saved, but unlike the Titanic, in "New York to Hong Kong in Two Hours!" there are no deferrals for women and children.

**Lockheed SR-71 Blackbird** Apr 15 2021 The SR-71 represents the very pinnacle of Cold War aircraft design and it has become an aviation icon. Together with its predecessor, the A-12, the Blackbird was a giant leap into the technical unknown and the design employed many forms of new technology made necessary by the excesses of speed, altitude and temperature to which the aircraft was subjected. Throughout its 34-year Air Force career, the SR-71 proved itself to be the world's fastest and highest flying operational manned aircraft. It set a number of world records for altitude and speed, including an absolute altitude record of 85,069ft on 28 July 1974, and an absolute speed record of 2,193.2mph the same day. This truly was a unique and ground-breaking aircraft, whose fascinating design history is explored here in full and illuminated with photographs and detailed technical illustrations.
