United States and Allied Submarine Successes in the Pacific and Far East During World War II, 4th ed. Apr 27 2022 Here is a comprehensive accounting of all United States and allied submarine attacks on the Japanese for which success was claimed or occurred. The expanded coverage focuses on successes by U.S. and British and Dutch submarines in the Pacific and Indian oceans, Soviet submarines, and losses caused by mines laid by submarines. The book also includes details from top-secret "Ultra" messages decoded during the war and recently translated documents that provide correct Japanese ship names, ship type and tonnage, convoy names, human loss numbers and other attack details, as well as a military evaluation of each attack.

Observation of the Earth and Its Environment Nov 30 2019 This book is about spaceborne missions and instruments. In addition, surveys of airborne missions and of campaigns can be found on the accompanying CD-ROM in pdf-format. Compared with the 3rd edition the spaceborne part grew from about 300 to 1000 pages. The complete text - including the electronic-only chapters - contains more than 1900 pages. New chapters treat the history of Earth observation and university missions. The number of commercial Earth imaging missions has grown significantly. A chapter contains reference data and definitions. Extensive appendices provide a comprehensive glossary, acronyms and abbreviations and an index of sensors. An effort has been made to present the information in context, to point out relationships and interconnections. The book may serve as a reference and guide to all involved in the various national and international space programs: researchers and managers, service providers and data users, teachers and students.

European Valuation Practice Dec 12 2020 The variability of valuation practice within Europe is perceived as a problem within the globalization of property. This edited textbook examines the practice of real estate valuation in selected countries in Europe. The focus is on countries with well developed real estate markets in which both international and indigenous investors are active. The book is aimed at real estate professionals, financiers, institutional advisers, property researchers and students who require a greater understanding of comparative property appraisal techniques applied across Europe.
