Time-parallel Methods for Accelerating the Solution of Structural Dynamics Problems Feb 21 2022 The classical approach for solving evolution Partial Differential Equations (PDEs) using a parallel computer consists in first partitioning the spatial domain and assigning each subdomain to a processor to achieve space-parallelism, then advancing the solution sequentially. However, enabling parallelism along the time dimension, despite its intrinsic difficulty, can be of paramount importance to fast computations when space-parallelism is unfeasible, cannot fully exploit a massively parallel machine or when near-real-time prediction is desired. The aforementioned objective can be achieved by applying classical domain decomposition principles to the time axis. The latter is first partitioned into time-slices to be processed independently. Starting with approximate seed information that provides a set of initial conditions, the response is then advanced in parallel in each time-slice using a standard time-stepping integrator. This decomposed solution exhibits discontinuities or jumps at the time-slice boundaries if the initial guess is not accurate. Applying a Newton-like approach to the time-dependent system, a correction function is then computed to improve the accuracy of the seed values and the process is repeated until convergence is reached. Methods based on the above concept have been successfully applied to various problems but none was found to be competitive for even for the simplest of second-order hyperbolic PDEs, a class of equations that covers the field of structural dynamics among others. To overcome this difficulty, a key idea is to improve the sequential propagator used for correcting the seed values, observing that the original evolution problem and the derived corrective one are closely related. The present work first demonstrates how this insight can be brought to fruition in the context of linear oscillators, with numerical examples featuring structural models ranging from academic to more challenging large-scale ones. An extension of this method to nonlinear equations is then developed and its concrete application to geometrically nonlinear transient dynamics is presented. Finally, it is shown how the time-reversibility property that characterizes some of the above problems can be exploited to develop a new framework that provides an increased speed-up factor.

The Kefir Solution Jul 02 2020 Irritable Bowel Syndrome is the most common gastrointestinal disorder in the world. People with IBS are prescribed more medications, miss more work days, have lower work productivity and higher suicide rates than people without it. Yet the causes are still unknown, and there is no cure. Or rather – there was no cure, until now. Cutting-edge scientific research has found that IBS is nearly always connected to anxiety and depression through something called the gut-brain axis. Heal the gut and you can heal the brain – and vice versa. Enter The Kefir Solution. Developed by Shann Nix Jones, it uses kefir, a powerful natural probiotic to support your microbiome and help heal IBS without the use of chemicals. It has no nasty side effects but loads of health benefits – including alleviating the anxiety and depression that often go hand in hand with IBS. Combining common sense with uncommon science, Shann shares stories, tips and recipes to help you on your way to better gut health and a happier life. If you suffer from IBS, or know someone who does, and it's taken hold of your life, this book could lead you back to health and freedom.

Lectures on the Icosahedron and the Solution of the Fifth Degree Sep 16 2021 In this classic of mathematical literature, first published in 1884, Felix Klein elegantly demonstrates how the rotation of icosahedron can be used to solve complex quintic equations. Divided into two parts- "Theory of the Icosahedron" and "The Theory of Equations of the Fifth Degree"-The Icosahedron covers: . the regular solids and the theory of groups . introduction of $(x + iy)$. statement and discussion of the fundamental problem, according to the theory of functions . the algebraical character of the fundamental problem . general theorems and

survey of the subject . the historical development of the theory of equations of the fifth degree . introduction of geometrical material . the canonical equations of the fifth degree . the problem of the A's and the Jacobian equations of the sixth degree . the general equation of the fifth degree Complete with detailed equations and instructive material, The Icosahedron will be valued by experts in higher mathematics and students of algebra alike. German mathematician FELIX KLEIN (1849-1925) specialized in function theory, group theory, and non-Euclidean geometry. His published works include Elementary Mathematics from an Advanced Standpoint: Arithmetic, Algebra, Analysis; Elementary Mathematics from an Advanced Standpoint: Geometry; and Famous Problems of Elementary Geometry.

Pointwise Bounds for Solutions of the Cauchy Problem for Elliptic Equations Nov 06 2020 An analysis is presented which deals with a technique for approximating the solution to a Cauchy problem for a general second-order elliptic partial differential equation defined in an N-dimensional region D. The method is based upon the determination of an a priori bound for the value of an arbitrary function u at a point P in D in terms of the values of u and its gradient on the Cauchy surface and A FUNCTIONAL OF THE ELLIPTIC OPERATOR APPLIED TO U. If the Solution Becomes a Problem, What Do You Do? Jul 22 2019 What are a woman's potential? What is a woman's basic communication style? What are the purpose, and designed of the woman? Is the woman to blame for the fall of mankind? The million dollar question? Are women meant to be leaders? I chose this book to encourage all women in ministry who are going through rejection by our male counterpart for their frustration in the Body today. This frustration is a result of the obvious use of women by the Lord. There are instances wherein the Lord is using women to pastor churches and even from reformations through the gift of Apostleship in the book of Romans. I admit that there are some abuses to ministry, however, the same is equally true or more so, in the case of men who have abused their gifts in the Body. Nevertheless, God's truly called out handmaidens are getting the job done. They are successfully doing the work of the Lord. They operate in the ministry as the bone of His bones and the flesh of His flesh. Their works speak of them. There are men who desire to move in God and are being drawn to these women, by God. Their gender is no longer an issue.

Solution Thermodynamics and its Application to Aqueous Solutions Aug 27 2022 As the title suggests, we introduce a novel differential approach to solution thermodynamics and use it for the study of aqueous solutions. We evaluate the quantities of higher order derivative than the normal thermodynamic functions. We allow these higher derivative data speak for themselves without resorting to any model system. We thus elucidate the molecular processes in solution, (referred to in this book "mixing scheme"), to the depth equal to, if not deeper, than that gained by spectroscopic and other methods. We show that there are three composition regions in aqueous solutions of non-electrolytes, each of which has a qualitatively distinct mixing scheme. The boundary between the adjacent regions is associated with an anomaly in the third derivatives of G. The loci of the anomalies in the temperature-composition field form the line sometimes referred as "Koga line". We then take advantage of the anomaly of a third derivative quantity of 1-propanol in the ternary aqueous solution, 1-propanol – sample species – H₂O. We use its induced change as a probe of the effect of a sample species on H₂O. In this way, we clarified what a hydrophobe, or a hydrophile, and in turn, an amphiphile, does to H₂O. We also apply the same methodology to ions that have been ranked by the Hofmeister series. We show that the kosmotropes (salting out, or stabilizing agents) are either hydrophobes or hydration centres, and that chaotropes (salting in, or destabilizing agents) are hydrophiles. EBOOK: The Solution-Focused Helper: Ethics and Practice in Health and Social Care Jul 14 2021 "Walsh's book is not only thorough, thoughtful, and clearly written, it is also timely because as SF practice applications with their parallel knowledge bases continue to multiply, the questions Walsh addresses so competently are cutting edge for adopting a SF approach to practice in human services." Peter De Jong, Solution-focused Therapist, Trainer, and Consultant and Emeritus Professor of Social Work, Calvin College, USA Based in part on original research with over 50 practitioners, this absorbing book provides a practice model for solution-focused helping, developed from real-life experiences across a number of settings. The book begins by reviewing the original De Shazer and Berg practice model, establishing a case for change and then introduces a new concept for the solution-focused helper. Case examples are used to demonstrate the application of this new model in five different practice settings: Healthcare Learning disability Services for older people and end-of-life care Community development Services for globalised diverse communities Reflective exercises and research reviews are included for each setting as well as sections on policy contexts and ethical dimensions. The Solution-Focused Helper will support students and practitioners who are already familiar with the basic concepts and principles of solution-focused work and who wish to develop their practice and deepen their knowledge.

Grasp The Solution Aug 15 2021 Innovation distinguishes between a leader and a follower... Which do you want to be? GRASP The Solution is a refreshingly pragmatic and straight-talking guide to making decisions and solving problems creatively. If you've always thought creativity was all fluff and no substance, this book will make you think again. How to find the best answers to everyday challenges Struggling to come up with new and innovative ideas? Got the idea but can't make it happen? Frustrated trying to find the right answers? Fed up of failed group brainstorming sessions? Chris Griffiths (head of ThinkBuzan, the organisation behind Mind Mapping the thinking tool used by millions worldwide) compels you to let go of what's killing your creativity. In just four clear steps, he shows you how to unleash bold, fresh ideas and solutions in a systematic way to help you triumph innovatively over any challenge. Testimonials "Chris shows with clarity and persuasiveness that creative thinking is not magic, but a process that can be learned, developed, and most importantly applied to the challenges, whether business or personal, that confront us all. An excellent resource. Grasp it." Tim Hurson, Author of 'Think Better: An Innovator's Guide to Productive Thinking!' "Chris and his work have changed my life, and already millions of lives for the better worldwide. His work is in the process of doing the same for YOU!" Tony Buzan, Multi-million copy best-selling Author and Inventor of Mind Mapping "A must-read with accurate techniques to power up your thinking process and productivity. I'd recommend this book to anybody who is open to move forward and look at challenges differently. If you want to turn your problems into practical solutions, this book will definitely help you." Philippe Packu, Business Analyst, Sony "Organizations are proclaiming the need to 'work smarter' Chris Griffiths provides a road map of how to do that." Bob Ulrich, Author of 'Disciplined For Life' and 'You Are the Author of Your Future' "This book provides new tools and techniques about creativity and innovation for your personal, professional and social success. It helps you think differently. Read it and become a trailblazer!" Professor M.S. Rao, International Leadership Expert and Author of 'Success Sutras Lead Your Life Successfully' "If everybody could read Chris's book and incorporate his suggestions on a daily basis, we would all go straight to the point and gain the most appreciated treasure: time!" Oriol Marimon-Clos, CEO, Ideas Angels "Chris has profoundly changed my way of thinking and creating solutions, and has sounded a creative voice that I did not know existed." Ed Allen, Rear Admiral, US Navy (ret) Executive Business Coach, Executive Success Group "I obtained many ideas and a real shift in my thinking." John Brooker, Yes! And... "I consider Chris Griffiths one of the great talents that will

bloom in the years ahead." Ron Kaufman, Best-selling Author of 'UP Your Service!' "Chris challenges people to break from 'old ways' and embrace creative ideas for doing things differently." Brenton Nicholls, Director, Impact Unlimited "Chris is a rare breed of entrepreneur and business expert: He completely understands all the theory, but does not over-indulge it. Instead, he takes it and makes it useful to the real world. This book is perhaps the best evidence of this, and will not only help you to generate better ideas, but (most importantly) bring them to life and make them real!" Liam Hu

Recent Developments in the Solution of Nonlinear Differential Equations Apr 23 2022 Nonlinear differential equations are ubiquitous in computational science and engineering modeling, fluid dynamics, finance, and quantum mechanics, among other areas. Nowadays, solving challenging problems in an industrial setting requires a continuous interplay between the theory of such systems and the development and use of sophisticated computational methods that can guide and support the theoretical findings via practical computer simulations. Owing to the impressive development in computer technology and the introduction of fast numerical methods with reduced algorithmic and memory complexity, rigorous solutions in many applications have become possible. This book collects research papers from leading world experts in the field, highlighting ongoing trends, progress, and open problems in this critically important area of mathematics.

The Solution Book: 101 Techniques for Successful Ideation and Problem Solving Oct 29 2022 CB Insights study suggests that 42% of startups fail because they do not identify the right need, in other words: there is no need for the startup or product in the first place. The issue here is the lack of tools used to generate the ideas and validate those. Bottom line, this issue is about a structured approach to idea generation and problem-solving. Do you know that most people engaged in collective problem solving spend a lot of their valuable time in meetings, discussing ideas, which they think eventually do not add value to product or startup? Harvard Business Review survey suggests that 71% of managers feel that meetings do not help accomplish much, as they do not have specific templates and exercises to guide specific outcomes with engagement from participants. THE SOLUTION BOOK is going to help you in experimenting with ideas effectively by providing you steps on how to create a framework for coming up with new ideas and products, considering a variety of views, develop teamwork and collaboration keeping you better focused on your results and outcomes. The solution book consists of 101 easy to follow techniques on problem-solving and ideation. Startup, innovation and venture failures are expensive and justified only by lack of tools and data for analysis. The book caters to all stages in your lifecycle as a creative thinker and problem solver with tools to optimize your resources, go beyond conventional solutions and experiment with divergent (out of the box) thinking thanks to Elina Kallas, a researcher on entrepreneurship education with European Commission and in entrepreneurship at Harvard University, and Vidyangi Patil, an interdisciplinary professional of Biomedical Engineering with an extensive startup and research experience.

THE SOLUTION TO ALL OF HUMANITY'S PROBLEMS and The Secret to Creating the Life You Want Jan 08 2021 How did a thirteen-year-old kid manage to retain a Yale University professor's request to work on the design of a secret invention at a private research facility? ...on his own without anyone helping him? "It was because at age 12, I applied a simple principle," says William Eastwood. What William Eastwood discovered in the 1970's in his youth, YEARS BEFORE Einstein's friend, David Bohm published "Wholeness and the Implicate Order" in the 1980s, was a secret about the universe. "When the science came out," Eastwood adds, "I had already been testing it for over five years. By the time I was 22, I owned three large historic homes on the coast of Maine. And I credit the worldview given in this book for all of those achievements." David Bohm is the physicist who Albert Einstein called "a kindred spirit," and who's Ph.D. thesis - being top secret and classified - was awarded at the University of California at Berkeley by no other than Robert Oppenheimer himself. Bohm tells us that the environment around each of us IS A PROJECTION OF OUR MIND, BRAIN AND FIVE SENSES. "Early scientist missed this," says Eastwood, "and as a result settled on a picture of reality that was missing facts, VERY IMPORTANT FACTS that Bohm discovered. If we apply the science and change our core beliefs in a specific way, we can solve the world's problems and achieve any goal. That's why I had to write 'The Solution...'" "Putin's terror war against Ukraine, the attack on democracy, crime, social and personal problems alike, all have a simple solution, and I know what it is." So powerful is Eastwood's philosophy that the government prevented the publication of this book for over twenty years. It has only recently been made available to the public, and only because Eastwood used the philosophy to overcome the government's attempts to stop him. Will you give William Eastwood the chance he deserves? In "The Solution..." Eastwood explains exactly what is causing the problems in our world today. He gives you the solution to all of humanity's problems and then explains exactly how you can create what you want in life. He does so in simple and easy to understand words that anyone can understand. Others have agreed: "We can literally change the course of civilization by lifting the race to a higher path through implementing 'The Solution...'" says Mario Fusco, TH.D., RS.D, B.S.C.... There is nothing else like this book in the world today.

The Solution May 12 2021 Are you living the life that you always imagined, the life that you really desire? Can you realize your dreams, or are they gradually slipping away from you? Life is indeed a wondrous journey, but modern living has caused many to loose their way, drifting far from their intended life. Start to create the life you live as it was originally intended to be lived, free of the chains created by modern society, a life built upon joy and bliss. Stop surrendering the decisions controlling your life by allowing others to interfere with your future, you have the right to make all the choices concerning how you experience your life. Start living the life that you deserve by taking back control over your destiny. Direct your desires towards creating a life that you truly deserve, realizing your dreams, creating the things that you want, gaining the know-how into what life is really all about. When planning a holiday most people take care of all the details in advance, booking flights, arranging transport, hotel accommodation, tour guides, et cetera. Yet in life, the greatest journey that everyone will ever make, most people don't prepare or plan their life course as well as they should; they don't work to create a life of joy, peace, health and wealth. Develop the seeds for thought that will be the basis to create a new and richer life for yourself. Richness is not financial, but rather a life of bliss, something money can't buy. Take care of every detail of your life, leaving no stone unturned, never just scratch the surface of anything you undertake, do it fully, until it is entirely completed, this is the only way to avoid regrets. Life was never meant to be difficult, it was meant to be a wondrous adventure, that ideal is traded for whatever exists because of complacency when whatever occurs is accepted uncompromisingly. For many the status quo is far more acceptable than taking the supposed risks of change. You can't change anything that has gone by, but living life to its full extent and purposes is truly a joy to carry with you forever. The things that really matter must be clearly identified, you do the have an influence upon determining them. Each of us are creators with the potential to achieve even the wildest dreams if the necessary effort is simply put into achieving or obtaining the things desired. Consider the directions

to take to begin the journey back to your true life path. The purpose and meaning of your life are to give purpose and meaning to life; to find out not only who you are but also who you have the potential to be, then pursue that goal. Open your mind to the infinite possibilities that do exist for you. Born through your dreams, then crystallized into form by your desires, given impetus by your expectations, then made real through your beliefs. Life is made up of chances to make choices, decisions what you wish to do; the accumulated result of those choices is what is called your life. The purpose and meaning of your life is to give purpose and meaning to life; to find out not only who you are but also who you have potential to be, then pursue that goal. Open your mind to the infinite possibilities that do exist for you. Born through your dreams, then crystallised into form by your desires, given impetus by your expectations, then made real though your beliefs. Life is made up of chances to make choices, decisions what we wish to do; the accumulated result of those choices is what we call our life.

The Solution to an Injustice in Trials Oct 17 2021 This 664 page law and logic book contains the most comprehensive and detailed description of the composition of argument ad hominem ever published, revealing this form of argument to be a far broader fallacy than was previously known. Like perjury, argument ad hominem can deceive juries and cause unjust trial verdicts. There is, fortunately, already a criminal law against perjury, but, unfortunately, there is currently no law that expressly prohibits argument ad hominem in trials. The book includes the text of a proposed criminal law that expressly prohibits argument ad hominem in trials, and shows the necessity of such a law to counter effectively this quite common form of injustice in jury trials. Coupled Boundary and Finite Element Methods for the Solution of the Dynamic Fluid-Structure Interaction Problem Nov 18 2021 This text considers the problem of the dynamic fluid-structure interaction between a finite elastic structure and the acoustic field in an unbounded fluid-filled exterior domain. The exterior acoustic field is modelled through a boundary integral equation over the structure surface. However, the classical boundary integral equation formulations of this problem either have no solutions or do not have unique solutions at certain characteristic frequencies (which depend on the surface geometry) and it is necessary to employ modified boundary integral equation formulations which are valid for all frequencies. The particular approach adopted here involves an arbitrary coupling parameter and the effect that this parameter has on the stability and accuracy of the numerical method used to solve the integral equation is examined. The boundary integral analysis of the exterior acoustic problem is coupled with a finite element analysis of the elastic structure in order to investigate the interaction between the dynamic behaviour of the structure and the associated acoustic field. Recently there has been some controversy over whether or not the coupled problem also suffers from the non-uniqueness problems associated with the classical integral equation formulations of the exterior acoustic problem. This question is resolved by demonstrating that the solution to the coupled problem is not unique at the characteristic frequencies and that it is necessary to employ an integral equation formulation valid for all frequencies.
