Moon Manual Jun 17 2021 There is renewed interest in the Moon in recent years, with the news that a Chinese lunar rover landed on the Moon in January 2014, and NASA announcing that it is looking for private partners to land a robot on the Moon's surface, as the first step in a programme to exploit the commercial opportunities offered by the Moon. Recent lunar expeditions by both orbiting spacecraft and 'landers' have uncovered far more detail about the Moon's surface and geology, including the trail of Neil Armstrong's first walk on the Moon in 1969. This manual explains in simple and straightforward terms, with a wealth of illustrations and photographs, what we have discovered about the Moon over the centuries, along with a general overview of the vehicles involved in the exploration.

Milky Way Owners' Workshop Manual Jul 31 2022 From our special place in the Orion Arm to the Milky Way's future collision with the Andromeda Galaxy, Milky Way Owners' Workshop Manual looks at the structure, formation and evolution of our home galaxy and its place in the universe. Find out how it compares to other galaxies, why it could be unique, and discover the most exciting and perplexing phenomena within it, including supernovae, the different kinds of stars, planetary systems and radiation, plus the monstrous, super-massive black hole Sagittarius A*. The various spacecraft that are observing our galaxy are introduced, as they help us to piece together a clearer picture of its structure, investigating the mind-blowing processes within it and giving us a snapshot into its future. A companion volume to our forthcoming Universe Manual and Planets of the Solar System Manual, and complementing Haynes' existing Earth, Moon and Mars manuals, this book provides a down-to-earth, digestible guide to our galaxy for the layperson.

Universe Owners' Workshop Manual Mar 27 2022 Universe Owners' Workshop Manual addresses themes in astronomy over the last few hundred years by which we came to understand the origin and evolution of the universe at large, the processes by which planetary systems form, and the chances of life being ubiquitous. Trees Owners' Workshop Manual Feb 11 2021 *Trees* is a comprehensive manual showing how to select, plant and maintain trees, and focuses on finding the right tree for the right place. It explains some of the many benefits of trees that are applicable to homeowners. For example – as well as being attractive garden features, trees planted in the right position can reduce your heating bill, lower noise levels and filter air pollution. There are many other practicalities and issues associated with trees, such as subsidence, proper care and maintenance, legal issues and choosing a reputable tree-care professional. However, there are a lot of urban myths and misconceptions around trees too. This manual shows readers how trees ‘work’, including the huge advances in our understanding of trees over the last 20 years, what they need to survive and thrive in our urban environments and how to use trees (as a biotechnology) to improve our immediate and wider environment. The manual includes sections on: - Selecting and buying a tree - Tree benefits to the home, health and environment - Preparation and planting - Care, maintenance and pruning - Pests and diseases - Tree species profiles - Troubleshooting Which species of tree is best for your home and garden? How should you look after it to get the most out of it? How and where do you get impartial advice? What will a changing climate mean for your tree? These are just some of the questions we will be answering in this book. The manual guides the reader through selecting the right tree for the right place, planting, and how to establish, care for, prune and maintain your tree. For professionals engaged in managing and maintaining trees there already exists a vast array of technical books and manuals. However, there is nothing practical written for the homeowner, despite around 60–70% of all trees in towns and cities being in private ownership. Your tree may be important to you, but it is also part of a greater whole, what some call the ‘urban forest’: the collection of trees, shrubs, grass and plants in and around human settlements. Whether your tree is already established or yet to be planted, it could be providing pleasure (or pain) to many different people for generations. Kenton Rogers has worked with trees for over 25 years, including positions with the Duke of Wellington’s estate as assistant forester and as a Trustee for the International Tree Foundation. In 2011 he co-founded Treeconomics, a social enterprise with a mission to highlight the benefits of trees. He is a Chartered Forester and a Fellow of the Royal Geographical Society. Tony Kirkham started at Kew as a student where he gained the Kew diploma at honours. In 1981 he was appointed manager of the North Arboretum, from where he progressed to become Head of the Arboretum and Horticultural Services. Tony is best known for his appearances in the BBC series ‘A Year at Kew’ and ‘The Trees That Made Britain’.
