Seaweeds and microalgae Jun
 05 2020 Algae, including
 seaweeds and microalgae,
 contribute nearly 30 percent of
 world aquaculture production
 (measured in wet weight),
 primarily from seaweeds.
 Seaweeds and microalgae
 generate socio-economic
 benefits to tens of thousands of
 households, primarily in coastal
 communities, including
 numerous women empowered
 by seaweed cultivation. Various
 human health contributions,
 environmental benefits and
 ecosystem services of

seaweeds and microalgae have
 drawn increasing attention to
 untapped potential of seaweed
 and microalgae cultivation.
 Highly imbalanced production
 and consumption across
 geographic regions implies a
 great potential in the
 development of seaweed and
 microalgae cultivation. Yet joint
 efforts of governments, the
 industry, the scientific
 community, international
 organizations, civil societies,
 and other stakeholders or
 experts are needed to realize
 the potential. This document
 examines the status and trends
 of global algae production with
 a focus on algae cultivation,
 recognizes the algae sector's
 existing and potential
 contributions and benefits,
 highlights a variety of
 constraints and challenges over
 the sector's sustainable
 development, and discusses
 lessons learned and way
 forward to unlock full potential
 in algae cultivation and FAO's
 roles in the process. From a
 balanced perspective that
 recognizes not only the
 potential of algae but also
 constraints and challenges
 upon the realization of the
 potential, information and
 knowledge provided by this
 document can facilitate
 evidence-based policymaking
 and sector management in
 algae development at the
 global, regional and national
 levels.

Coalition Government Penal Policy 2010-2015 May 17 2021

This book shows how the overall impact of the penal policy agenda of the Coalition Government 2010-2015 has not led to the intended 'rehabilitation revolution', but austerity, outsourcing and punishment, designated here as 'punitive managerialism'. The policy of austerity has led to significant budget cuts in legal aid and court services which threaten justice. It has also led to staffing reductions and overcrowding in the prison system which threaten order

and have undermined more positive work with prisoners. The outsourcing of prison and community-based offender services is based on untried method with uncertain results. The shift in orientation towards punishment is regrettable because it is essentially negative. The book notes that this move to punitive managerialism is located in the broader trend towards neo-liberalism. It concludes by attempting to articulate the parameters of an affordable and emotionally satisfying yet humane and rational penal policy.>
