The School of Venus Jun 17 2021 In an age where the Church ruled and anything but the missionary position with your spouse was a sin, people still wanted more. That is clear from the fact that this book exists, was translated from the original French to English, and at least one parliamentarian admitted to reading it. I'll add in my own assumption that even without this book there would be a lot of people asking for forgiveness for their bedroom activities based on the Church's guidelines. Samuel Pepys, an Admiral and Parliamentarian purchased his own copy in England, in 1668 when he saw it in an average book store. Though, he notes he bought it in plain binding as he intended to burn it after reading as not to disgrace himself if someone found it. He skipped church the next day to peruse his purchase and on conclusion wrote this in his diary: "It was not amiss for a sober man once to read over to inform himself in the villainy of the world... it did force my prick

beyond stand all the while."

A Manual of Occultism Jul 19 2021 This early works on Occultism is a comprehensive and informative study of Astrology, Palmistry, Thaumaturgic Art, Hypnotism & Mesmerism, and the Occult Arts. It is a fascinating read with much of the information still useful and practical today. Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

The Manual of Astrology, the Standard Work Dec 24 2021 First published in 1898, this is a very different astrology book from what we have now. There are extensive delineations for the signs of the zodiac, especially when found on the ascendant. There are delineations of planets in signs when they are in the first house or are the chart ruler, in both cases, describing the physical appearance. There are delineations of planets in the various houses, which will also serve for the planetary rulerships of the houses. There are only sketchy notes on aspects. So far as the "pure astrology" of planets in signs, in houses, in aspect, there is almost nothing at all. The reason is found in the second part of the book. We are not reading the chart as a psychological abstraction. We are, instead, looking for specific traits, attempting to answer specific questions. Will we have a profession? What kind of marriage? What kind of children? Will we vanquish our enemies, or submit to them? What kind of illness? We then find the house(s) of the horoscope which rule the question, and then delineate the signs & planets we find there. These are, by the way, the sort of questions that clients would ask, if they only knew we could give answers! The sort of things that astrologers themselves want to know. In the process we learn how to read a chart & get real meaning from it. We get ideas from one section and then apply them to other sections. There are hundreds and hundreds of useful aphorisms, except that Sepharial doesn't label them as such. Get this book, study it, underline key passages, scribble in the margins. You will learn more from this book than most all others put together.

Eclipse Interpretation Manual Nov 22 2021 The eclipse is viewed as part of a sequence. Its initial influences are described along with the meanings of the solar & lunar eclipses in the signs & houses, & their aspects to the planets. The author covers the meaning of the Moon's Nodes & the importance of the eclipses when falling on any of the four angles. Her delineation techniques are clearly explained.

Grow Your Own Venus Fly Trap May 17 2021 Enter the mysterious realm of a true oddity-a carnivorous plant. The book that comes with this kit leads you on an absorbing journey from a contemplation of how the flytrap works without muscles or nerves to the care and feeding of the plant. Scientists as well as everyday gardeners are fascinated by this natural wonder, which-despite its primeval exoticism-is actually indigenous to the southern U.S. The kit contains Venus Flytrap seeds, mini planter, peat pellet, sand, sealable plastic bag for a terrarium effect, and the 32-page guidebook. The plant doesn't actually grow as fast or as large as the most famous Venus Flytrap-"Audrey" in Little Shop of Horrors-but that's good news for the pets in the family.

The Education of a Christian Woman Jan 13 2021 "From meetings and conversation with men, love affairs arise. In the midst of pleasures, banquets, dances, laughter, and self-indulgence, Venus and her son Cupid reign supreme. . . . Poor young girl, if you emerge from these encounters a captive prey! How much better it would have been to remain at home or to have broken a leg of the body rather than of the mind!" So wrote the sixteenth-century Spanish humanist Juan Luis Vives in a famous work dedicated to Henry VIII's daughter, Princess Mary, but intended for a wider audience interested in the education of women. Praised by Erasmus and Thomas More, Vives advocated education for all women, regardless of social class and ability. From childhood through adolescence to marriage and widowhood, this manual offers practical advice as well as philosophical meditation and was recognized soon after publication in 1524 as the most authoritative pronouncement on the universal education of women. Arguing that women were intellectually equal if not superior to men, Vives stressed intellectual companionship in marriage over procreation, and moved beyond the private sphere to show how women's progress was essential for the good of society and state.

Book of Instructions in the Elements of the Art of Astrology Jan 31 2020 Al Biruni, one of the greatest Arab scholars, was born on September 4, 973, in what is now Uzbekistan. He showed talent at an early age and by his early 20's had written several acclaimed papers. Political unrest in his 20's and 30's found him at one point at Gurgan, on the shores of the Caspian Sea. Peace found him in Ghaznah, which is today in Afghanistan. From 1017 to 1030 he travelled extensively in India, becoming fluent in Sanskrit. From this he wrote his monumental survey, India, of the history, customs and beliefs of the subcontinent. His other books include The Chronology of Ancient Nations, the Masudic Cannon, Book of Instructions, and more than 100 others, some of which are lost. He died on December 13, 1048, aged 75. He is buried in Ghaznah. The Book of Instruction in the Elements of the Art of Astrology was written for Lady Rayhanah, to whom it is dedicated. R. Ramsay Wright, the translator, said it could be regarded as a primer of 11th century science. Among its highlights are a

comprehensive list of more than 150 Lots, various forms of aspects and planetary relationships, planetary positions relative to the sun, an excellent text on rulerships as well as comprehensive notes on weather and meteorological phenomena. This book was unknown to medieval European astrologers. This edition, comprising the astrological part of the original (sections 347-530) has been taken from Wright's pioneering 1934 translation, itself taken from Persian and Arabic sources. For this edition, text and tables have been reset, and a new index added.
