Noun Phrases and Nominalization in Basque Jul 19 2021 This collective volume on nominal expressions in Basque, a language isolate with no known relatives, comprises original papers on the syntactic structure and the interpretation of both Noun Phrases and nominalization constructions a traditionally neglected aspect of Basque linguistics. The minute attention to properties and paradigms previously overlooked, and the analyses of them in the light of recent advances in syntactic theory make this book a valuable tool for syntacticians, semanticists and morphologists. This work fills a gap in the theoretical study of Basque, and the richness of data presented makes it interesting for any researcher from whatever particular theoretical persuasion. This volume is especially useful for researchers, graduate students, and advanced undergraduate students of comparative grammar, typology, and theoretical linguistics.

G ö del, Escher, Bach Nov 30 2019 'What is a self and how can a self come out of inanimate matter?' This is the riddle that drove Douglas Hofstadter to write this extraordinary book. In order to impart his original and personal view on the core mystery of human existence - our intangible sensation of 'I'-ness - Hofstadter defines the playful yet seemingly paradoxical notion of 'strange loop', and explicates this idea using analogies from many disciplines.

National System of Political Economy Mar 27 2022 In all ages, nations and powers have striven to attain to the dominion of the world, but hitherto not one of them has erected its power on so broad a foundation [as industry, commerce, and navigation]. How vain do the efforts of those appear to us who have striven to found their universal dominion on military power... -from "Chapter 33: The Insular Supremacy and the

Continental Powers-North America and France" One of the most prominent economic philosophers of the 19th century, on a par with-but espousing quite different thinking than-Karl Marx and Adam Smith explores, in the three-volume National System of Political Economy, a reasoned doctrine of national and pan-national management of trade, a global collaboration between government and business. Volume 3 explores the economic and political systems that nurture ascendant nations in their global sovereignty. A close reading of this 1841 classic is an absolute necessity for anyone who hopes to understand world economic history of the last 150 years. German economist and journalist FRIEDRICH LIST (1789-1846) served as professor of administration and politics at the University of Tübingen, but was later jailed and later exiled to America for his political views. His is also the author of Outlines of American Political Economy (1827).

[Motivation And Personality](#) Feb 11 2021 I have tried in this revision to incorporate the main lessons of the last sixteen years. These lessons have been considerable. I consider it a real and extensive revision-even though I had to do only a moderate amount of rewriting-because the main thrust of the book has been modified in important ways which I shall detail below.

[Folk Devils and Moral Panics](#) Dec 12 2020 'Richly documented and convincingly presented' -- New Society Mods and Rockers, skinheads, video nasties, designer drugs, bogus asylum seekers and hoodies. Every era has its own moral panics. It was Stanley Cohen's classic account, first published in the early 1970s and regularly revised, that brought the term 'moral panic' into widespread discussion. It is an outstanding investigation of the way in which the media and often those in a position of political power define a condition, or group, as a threat to societal values and interests. Fanned by screaming media headlines, Cohen brilliantly demonstrates how this leads to such groups being marginalised and vilified in the popular imagination, inhibiting rational debate about solutions to the social problems such groups represent. Furthermore, he argues that moral panics go even further by identifying the very fault lines of power in society. Full of sharp insight and analysis, Folk Devils and Moral Panics is essential reading for anyone wanting to understand this powerful and enduring phenomenon. Professor Stanley Cohen is Emeritus Professor of Sociology at the London School of Economics. He received the Sellin-Glueck Award of the American Society of Criminology (1985) and is on the Board of the International Council on Human Rights. He is a member of the British Academy.

Born to Run Nov 10 2020 At the heart of Born to Run lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

[Customary International Humanitarian Law](#) Jul 31 2022 Customary International Humanitarian Law, Volume I: Rules is a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non-international armed conflicts. In the absence of ratifications of important treaties in this area, this is clearly a publication of major importance, carried out at the express request of the international community. In so doing, this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts. Comment Don:RWI.

The Hasheesh Eater Apr 15 2021 Fitz-Hugh Ludlow was a recent graduate of Union College in Schenectady, New York, when he vividly recorded his hasheesh-induced visions, experiences, adventures, and insights. During the mid-nineteenth century, the drug was a legal remedy for lockjaw and Ludlow had a friend at school from whom he received a ready supply. He consumed such large quantities at each sitting that his hallucinations have been likened to those experienced by opium addicts. Throughout the book, Ludlow colorfully describes his psychedelic journey that led to extended reflections on religion, philosophy, medicine, and culture. First published in 1857, The Hasheesh Eater was the first full-length American example of drug literature. Yet despite the scandal that surrounded it, the book quickly became a huge success. Since then, it has become a cult classic, first among Beat writers in the 1950s and 1960s, and later with San Francisco Bay area hippies in the 1970s. In this first scholarly edition, editor Stephen Rachman positions Ludlow's enduring work as not just a chronicle of drug use but also as a window into the budding American bohemian literary scene. A lucid introduction explores the breadth of Ludlow's classical learning as well as his involvement with the nineteenth-century subculture that included fellow revelers such as Walt Whitman and the pianist Louis Gottshalk. With helpful annotations guiding readers through the text's richly allusive qualities and abundance of references, this edition is ideal for classroom use as well as for general readers.
