On a Global Mission: The Automobiles of General Motors International Volume 3 Jun 05 2020 Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Japan and the European Periphery Apr 15 2021 The book describes Japanese economic links with peripheral regions in Europe. Focusing particularly on manufacturing investment, the impact of Japanese firms is assessed against a background of increasing European economic integration. The uneven distribution of Japan's economic presence in Europe is emphasised, as is the importance of core economic regions for future investment activity. The growing importance of core regions is then linked to emerging patterns in the growth of science-based industries, as well as efforts by national and regional agencies to attract inward investment.

Breaking the Chains Jan 13 2021 Deemed the funniest Australian success story yet! "Uni Student Preston King started off with little chance in his favour. With only five hundred dollars in his back pocket and the odds heavily stacked against him, he worked like a slave-rat during his university life. By the time he graduated, he had seven scholarships to his name, a top graduate salary at a multinational corporation, a property portfolio with a combined worth of seven figures and memories to last a lifetime. Never underestimate the potential of a student with a burning desire to get rich." A must read for anyone with a sense of humour!
