More Advanced Reading/Comprehension Tests 23 2022

Reading Comprehension Research and Testing in the US 2020 This book challenges traditional, sanctioned, and official histories of reading comprehension by examining how ideological and cultural hegemony work to reproduce dominant ideologies through education in general and reading comprehension research and testing specifically. Willis analyzes the ideological and cultural foundations of reading comprehension research, theories, research, tests, and interpretations, and connects these to the broader social and political contexts within U.S. history in which reading comprehension research evolved. The reconstruction of a history of reading comprehension research and testing in this way demystifies past and current assumptions about the interconnections among research, testing, and standardized reading comprehension tests. A promising vision of the future of reading comprehension research and testing emerges—one that is more complex, more inclusive, and socially just. Reading Comprehension Research and Testing in the U.S. aims to revolutionize how reading comprehension is conceived, theorized, tested, and interpreted for all students. A critically relevant volume for educational researchers, teacher educators, school administrators, teachers, policy makers, and all those concerned with school literacy and educational equity.

Reading Comprehension Tests for the CEM Test 2020

Assessing Second Language Reading Ability 2020 This book investigates the issue of cloze-validity as a measure of second language reading comprehension. It starts off by making a distinction between general reading ability and the more specific reading comprehension followed by a thorough review of the related research on L2 reading comprehension and sorting out the confusion in the literature. A comprehensive account of cloze procedure is presented discussing its origin, different versions, its use for teaching and testing purposes, as well the latest research on reading ability, language proficiency and second language reading. The book includes studies conducted at several stages on validating cloze as a measure of reading and interview and questionnaire studies. The book is applied to investigate the validity of eight cloze tests, criterion reading tests, and other cloze and reading tests in general. Two new cloze tests, i.e. reader-centered cloze test and phrase cloze test, are introduced and researched as measures of reading ability. The book concludes with suggestions for developing tests that can better measure reading comprehension in light of recent research on the complex and dynamic nature of reading. This book will appeal to researchers, lecturers and graduate and post-graduate students taking a course in Second Language Acquisition, Applied Linguistics, Language Assessment, and Educational Measurement.

Maez 2022 Based on the analysis of a specially compiled corpus of internationally recognized English as a foreign language (EFL) reading tests of different levels of proficiency, this volume explores the relation between the complexity of written texts and the difficulty of reading comprehension tests. It brings together linguistic and inherent complexity of the tests and a study of the data derived from their administration to groups of Italian university students. The study of text complexity draws on corpus linguistic and systemic functional linguistics. Both quantitative and qualitative analyses are carried out on the language used in the reading texts and in the related tasks that make up the corpus of tests. The test difficulty, on the other hand, is informed by research on language testing, and, in particular, by findings and methodologies of Classical Test Theory and Item Response Theory. Relevant theories are used to analyze and interpret both the data obtained from the administration of the tests and the data collected by means of feedback questionnaires completed by test takers. Such diverse methodologies and the subsequent comparison of the results of the analyses has brought out interesting correlations between text-inherent complexity, perceived test difficulty and test difficulty.

Reading Comprehension 40 Multiple Choice Tests for 4th Grade 2021

Test-Taking Strategy Use in Reading Comprehension 2020 To shape the practice of everyday teaching, teachers need to have a holistic understanding of what happens in their classrooms. They need to systematically observe their teaching, interpret their classroom events, evaluate their outcomes, identify problems, find solutions, and try them out to see once again what works. As strategic practitioners, they need to develop knowledge and skills necessary to self-observe, self-analyze, and self-evaluate their own teaching acts. This book aimed to investigate the tests on cognitive and metacognitive strategy use. The author provided the interested readers a thorough review of related literature and scrutinized various concepts and issues such as ability, tasks, cognitive, metacognitive and test-taking strategy.
