[Improving Practice and Performance in Basketball](#) Oct 04 2022 Despite being one of the most popular sports worldwide, basketball has received limited research attention compared to other team sports. Establishing a strong evidence base with high-quality and impactful research is essential in enhancing decision-making processes to optimize player performance for basketball professionals. Consequently, the book entitled *Improving Performance and Practice in Basketball* provides a collection of novel research studies to increase the available evidence on various topics with strong translation to practice in basketball. The book includes work by 40 researchers from 16 institutions or professional organizations from 9 countries. In keeping with notable topics in basketball research, the book contains 2 reviews focused on monitoring strategies to detect player fatigue and considerations for travel in National Basketball Association players. In addition, 8 applied studies are also included in the book, focused on workload monitoring, game-related statistics, and the measurement of physical and skill attributes in basketball players. This book also has a strong focus on increasing the evidence available for female basketball players, who have traditionally been under-represented in the literature. The outcomes generated from this book should provide new insights to inform practice in many areas for professionals working in various roles with basketball teams.

[Air Quality Criteria for Oxides of Nitrogen](#) Jul 21 2021 Evaluates the latest scientific data on health effects of NO_x measured in laboratory animals and exposed human populations and the effects of NO_x on agricultural crops, forests and ecosystems, as well the NO_x effects on visibility and non-biological materials. Other chapters describe the nature, sources, distribution, measurement and concentrations of NO_x in the environment. Covers all pertinent literature through early 1993. Glossary of terms and symbols. Extensive bibliography. Charts, tables and graphs.

Handbook of Accelerator Physics and Engineering Aug 02 2022 Edited by internationally recognized authorities in the field, this expanded and updated new edition of the bestselling Handbook, containing more than 100 new articles, is aimed at the design and operation of modern particle accelerators. It is intended as a vade mecum for professional engineers and physicists engaged in these subjects. With a collection of more than 2000 equations, 300 illustrations and 500 graphs and tables, here one will find, in addition to the common formulae of previous compilations, hard-to-find, specialized formulae, recipes and material data pooled from the lifetime experience of many of the world's most able practitioners of the art and science of accelerators. The eight chapters include both theoretical and practical matters as well as an extensive glossary of accelerator types. Chapters on beam dynamics and electromagnetic and nuclear interactions deal with linear and nonlinear single particle and collective effects including spin motion, beam-environment, beam-beam, beam-electron, beam-ion and intrabeam interactions. The impedance concept and related calculations are dealt with at length as are the instabilities associated with the various interactions mentioned. A chapter on operational considerations includes discussions on the assessment and correction of orbit and optics errors, real-time feedbacks, generation of short photon pulses, bunch compression, tuning of normal and superconducting linacs, energy recovery linacs, free electron lasers, cooling, space-charge compensation, brightness of light sources, collider luminosity optimization and collision schemes. Chapters on mechanical and electrical considerations present material data and important aspects of component design including heat transfer and refrigeration. Hardware systems for particle sources, feedback systems, confinement and acceleration (both normal conducting and superconducting) receive detailed treatment in a subsystems chapter, beam measurement techniques and apparatus being treated therein as well. The closing chapter gives data and methods for radiation protection computations as well as much data on radiation damage to various materials and devices. A detailed name and subject index is provided together with reliable references to the literature where the most detailed information available on all subjects treated can be found.

Campesino a Campesino Jun 27 2019 Campesino a Campesino tells the inspiring story of a true grassroots movement: poor peasant farmers teaching one another how to protect their environment while still earning a living. The first book in English about the farmer-led sustainable agriculture movement in Latin America, Campesino a Campesino includes lots of first-person stories and commentary from the farmer-teachers, mixing personal accounts with detailed analysis of the political, socioeconomic, and ecological factors that galvanized the movement. Campesino farmer leading a farmer to farmer training session in Mexico by Eric Holt-Gimenez Many years ago, author Eric Holt-Gimenez was a volunteer trying to teach sustainable agriculture techniques in the dusty highlands of central Mexico, with little success. Near the end of his tenure, he invited a group of visiting Guatemalan farmers to teach a course in his village. What he saw was like nothing he had known. The Guatemalans used parables, stories, and humor to present agricultural improvement to their Mexican compadres as a logical outcome of clear thinking and compassion; love of farming, of family, of nature, and of community. Rather than try to convince the Mexicans of their innovations, they insisted they experiment new things on a small scale first to see how well they worked. And they saw themselves as students, respecting the Mexicans' deep, lifelong knowledge of their own particular land and climate. All they asked in return was that the Mexicans turn around and share their new knowledge with others-- which they did. CAC campo3_photo by Food First This exchange was typical of a grassroots movement called Campesino a Campesino, or Farmer to Farmer, which has grown up in southern Mexico and war-torn Central America over the last three decades. In the book Campesino a Campesino, Holt-Gimenez writes the first history of the movement, describing the social, political, economic, and environmental circumstances that shape it. The voices and stories of dozens of farmers in the movement are captured, bringing to vivid life this hopeful story of peasant farmers helping one another to farm sustainably, protecting their land, their environment, and their families' future.

Transvenous Lead Extraction May 07 2020 In the last years, indications for defibrillators and cardiac resynchronization therapy have expanded enormously; for this reason, and also due to the extension of human life length, the number of patients with implanted cardiac devices have steadily increased. The leads implanted for the functioning of these devices, however, have a limited duration in time and more and more their extraction will be a frequent issue in clinical practice, in order to treat short- and long-term complications, such as infections and failures. Aim of this book is to provide readers with a state-of-the-art on lead extraction techniques. The chapters deal with leads characteristics, indications to lead removal, patient preparation, tools and techniques for extraction, and prevention and management of complications. In addition, a series of tips and tricks on how to treat some particular conditions (tight cost-clavicular space, fractured leads, ICD leads, endangered leads...etc.), are given. A new extracting technique, according to which the extraction is performed through the internal jugular vein is described; several examples are included and many figures provide a thorough depiction of this innovative procedure. The volume will be an excellent resource for all those involved in the management of cardiac patients: cardiologists, arrhythmologists, cardiac surgeons, GPs, pediatricians, and post-graduate students in these disciplines.

Passive and Active Structural Vibration Control in Civil Engineering Sep 30 2019 Base isolation, passive energy dissipation and active control represent three innovative technologies for protection of structures under environmental loads. Increasingly, they are being applied to the design of new structures or to the retrofit of existing structures against wind, earthquakes and other external loads. This book, with contributions from leading researchers from Japan, Europe, and the United States, presents a balanced view of current research and world-wide development in this exciting and fast expanding field. Basic principles as well as practical design and implementational issues associated with the application of base isolation systems and passive and active control devices to civil engineering structures are carefully addressed. Examples of structural applications are presented and extensively discussed.

Environmental Toxicity Testing Feb 02 2020 As an integral component of environmental policy, it has become essential to regulate and monitor toxic substances. Past emphasis has been primarily on analytical approaches to the detection of specific, targeted contaminants, thus allowing chemical characterisation. However, toxicity testing or biological assessment is necessary for ecotoxicological evaluation, and this offers marked benefits and advantages that complement chemical analysis. Key issues to be addressed include identification of pertinent tests, reproducibility and robustness of these tests, and cost considerations. This book examines these issues and describes and explains the approaches that have been developed for environmental toxicity evaluations. Advantages, benefits and drawbacks of the strategies and methods are highlighted. Directed equally at ecotoxicologists, industrial chemists, analytical chemists and environmental consultants, this book is written in a way that will prove helpful to both new and experienced practitioners.

The Complete Cabin Crew Interview Manual Apr 17 2021 Suppose you can be prepared for your interview - so prepared that you can't fail. So confident that you can attend an interview and just blow the panel away. Would that interest you? Written by Caitlyn Rogers - Author of *The Cabin Crew Interview Made Easy*. Ms Rogers brings you the ultimate in cabin crew interview guides. *The Complete Cabin Crew Interview Manual* uncovers the mystery of the cabin crew interview to reveal tips, tricks and secrets that will ensure your success. You will discover exactly what interviewers really want and look for in an applicant and how you can demonstrate both the desired traits and skills necessary to get an edge and land the job of your dreams. You don't have to sit around hoping against all hope that you will finally get your chance to become cabin crew. If you have never attended a cabin crew interview or have been trying for a long period without success, this is the ideal book for you. You will be guided step by step through the entire selection process. You will discover... -How to complete your application form, write a cover letter and compose a CV that will gain maximum impact. -How to professionally answer any question that interviewers are likely to ask. With over 400 full length detailed answers provided and a formula to follow for creating your own answers, you will be fully prepared for any eventuality. -The best kept secret behind the selection process. This secret can mean the difference between success or failure within the first 5 minutes of attending the group interview. -What can be expected during the group interview and how you can demonstrate both the desired traits and skills necessary for cabin crew and what's more, the information and advice is universal and can be put into action with any airline in any country.

Asian Water Development Outlook 2016 Mar 05 2020 The Asian Water Development Outlook charts progress in water security in Asia and the Pacific over the past 5 years. This 2016 edition of the report uses the latest available data to assess water security in five key dimensions: household access to piped potable water and improved sanitation, economic water security, providing better urban water services to build more livable cities, restoring healthy rivers and ecosystems, and resilience to water disasters. The region shows a positive trend in strengthening water security since the 2013 edition of the report, when 38 out of 49 countries were assessed as water-insecure. In 2016, that number dropped to 29 out of 48 countries. This study was supported by ADB's Water Financing Partnership Facility.

Helicobacter Pylori in the 21st Century Jul 29 2019 *Helicobacter pylori* is a globally significant pathogen that infects half of the population of the world. Providing a broad overview of the understanding of this pathogen, this book explores a range of topics including virulence factors, vaccine development and obstacles, epidemiology, antibiotic resistance and the role of Nod receptors.

The Grace Walk Experience May 31 2022 For years, Steve McVey's *Grace Walk* (more than 200,000 copies sold) has inspired Christians to leave behind a performance and fear-based faith to embrace a faith lived in abundance and grace. Now *The Grace Walk Experience* workbook helps readers move that message of hope from their heads to their hearts as they explore eight truths that have changed lives worldwide daily, interactive studies that reveal grace as much more than a doctrine ways to quit "doing" for God so that He can live through them illustrations of the

wonder and miracle of faith as God intended God's Word, salvation, and evangelism with new perspective This excellent tool for church classes, small group discussion, and individual study will lead believers to understand their identity in Christ, let go of legalism, and make room for the overflowing love, mercy, and purpose of life lived wholly in God's grace.

Colossians and Philemon Dec 02 2019 For hundreds of years Christendom has been blessed with Bible commentaries written by great men of God highly respected for their godly walk and their insight into spiritual truth. The Crossway Classic Commentaries present the very best work on individual Bible books, carefully adapted for maximum understanding and usefulness for today's believers. Christians throughout the centuries have marveled at the spiritual treasures in the apostle Paul's letters to the Colossians and to Philemon. Grand themes of the supremacy of Christ, the superiority of the Gospel over false belief systems, the joy of setting one's focus on things above, and the love-bonds between all followers of the Savior continue to inspire Christians today. This classic commentary will encourage and equip all who desire a deeper walk with God and a growing faith in him.

Biomedical Advances in HIV Prevention Sep 22 2021 Biomedical Advances in HIV Prevention: Social and Behavioral Perspectives Lisa A. Eaton and Seth C. Kalichman, editors Three decades into the epidemic, a great deal is known about HIV and its transmission, more people are living with the disease, and the virus is no longer seen as a death sentence. But new people continue to be infected with HIV each year, making prevention strategies that are medically effective and behaviorally engaging as urgent a priority as ever. Biomedical Advances in HIV Prevention: Social and Behavioral Perspectives assembles the latest improvements, barriers to implementation, and possibilities for--and challenges to--future progress. Innovations such as pre-exposure prophylaxis (antiretroviral regimens for the high-risk uninfected) and treatment as prevention (early use of ART to reduce infectiousness of new patients) are examined, as are current findings on ongoing prevention and treatment concerns. Contributors illuminate the complex realities entailing adherence, pointing out technological, behavioral, and cultural roadblocks as well as opportunities to significantly reduce infection rates. Detailed up-to-the-minute coverage includes: Prevention services for persons living with HIV Adherence to HIV treatment as prevention and pre-exposure prophylaxis Advocating for rectal microbicides and safe lubricants Mental health and substance use in the scale-up of HIV prevention Risk compensation in response to HIV prevention Implementing biomedical HIV prevention advances: reports from South Africa, Uganda, Australia, Thailand, United States, Ecuador, and Peru Researchers, practitioners, and policy makers working in the fields of HIV/AIDS and public health will look toward Biomedical Advances in HIV Prevention: Social and Behavioral Perspectives as both a means for developing and assessing current programs and a blueprint for the next generation of prevention efforts.

Mesozoic Assembly of the North American Cordillera Aug 22 2021 "In this well-illustrated book, Hildebrand expands upon his model for the development of the North American Cordillera detailed in Special paper 457. Starting with an overview of Cordilleran geology he goes on to provide an in depth look at how the Rubian ribbon continent was assembled. He integrates the complex geology of the Cordillera into an actualistic model involving arc magmatism, arc-continent collision, slab failure magmatism, and transcurrent motion in both Rubia and the western North American margin. While much of the focus is on the assembly of the Rubian ribbon continent, Hildebrand explores its interactions with North America during the Sevier and Laramide events and concludes that North America was the lower plate in both"--Provided by publisher.
