Youth unemployment and social exclusion in Europe Aug 27 2019 This important new book presents the findings of the first comparative study of unemployed youth in Europe using a large and original data set. It addresses some of the key questions around the issue including: How do young people cope with unemployment? Does unemployment lead to social exclusion of young people, implying a withdrawal from society, financial deprivation and social isolation? Drawing on a research sample of over 17000 young unemployed people in ten European countries, the book examines how different welfare strategies and labour market policies in different countries influence the risk of social exclusion among unemployed youth.

Inflation and Activity - Two Explorations and their Monetary Policy Implications Aug 20 2021 We explore two issues triggered by the crisis. First, in most advanced countries, output remains far below the pre-recession trend, suggesting hysteresis. Second, while inflation has decreased, it has decreased less than anticipated, suggesting a breakdown of the relation between inflation and activity. To examine the first, we look at 122 recessions over the past 50 years in 23 countries. We find that a high proportion of them have been followed by lower output or even lower growth. To examine the second, we estimate a Phillips curve relation over the past 50 years for 20 countries. We find that the effect of unemployment on inflation, for given expected inflation, decreased until the early 1990s, but has remained roughly stable since then. We draw implications of our findings for monetary policy.

The Great Inflation May 29 2022 Controlling inflation is among the most important objectives of economic policy. By maintaining price stability, policy makers are able to reduce uncertainty, improve price-monitoring mechanisms, and facilitate more efficient planning and allocation of resources, thereby

raising productivity. This volume focuses on understanding the causes of the Great Inflation of the 1970s and '80s, which saw rising inflation in many nations, and which propelled interest rates across the developing world into the double digits. In the decades since, the immediate cause of the period's rise in inflation has been the subject of considerable debate. Among the areas of contention are the role of monetary policy in driving inflation and the implications this had both for policy design and for evaluating the performance of those who set the policy. Here, contributors map monetary policy from the 1960s to the present, shedding light on the ways in which the lessons of the Great Inflation were absorbed and applied to today's global and increasingly complex economic environment.

Youth Unemployment and Joblessness Jun 29 2022 Youth unemployment and joblessness are major issues for national governments and international organizations across the globe. In this respect, the school-to-work transition challenge is increasingly raising the interest of companies, education and training institutions, families and young people themselves, who are often involved in precarious and illegal forms of employment, in many countries of the world. In the field of industrial and labour relations, the school-to-work perspective seems particularly suitable for policy formulation and assessment: the broad and complex range of tools, strategies and policies for enabling youth training and their access to the labour market is deserving of a closer analysis at an international level in a time when jobless recovery threatens national economies. The ADAPT LABOUR STUDIES BOOK-SERIES has in connection been set up with a view to achieving a better understanding of the causes, consequences and possible responses to the issue in a global dimension through an interdisciplinary and comparative approach.

Self-Discovery Questions: Find Yourself and Your Life's Path in 5 Minutes a Day (599+ Questions) (3 Manuscripts in 1) Sep 28 2019 If you want to sculpt into existence a great life doing what you love, then the answers to these questions will be your hammer and chisel... Uncertainty. That's the word that plagues our generation. With sky-high tuitions and unemployment rates, the idea of a life-long job thrown out the window, and a sea of new opportunities available on the internet, we find that the 'life' game has changed, and we no longer have a blueprint for life or success. The worst part is that we hide this uncertainty in the back of our heads and avoid it in fear we won't have the answers we need to face it. An Unorthodox Solution Throughout the past year, I've helped thousands of people find out more about themselves and their path in life through my coaching and books. More often than I'd like to admit, I would say that the average person probably never needed my coaching to begin with, as most had the answers inside of them the whole time. "Perhaps all people need is someone to ask them the right questions, and some courage to answer them", I thought. A 3 in 1 Book Bundle That's when I decided to put this book together. Self-Discovery Questions: Find Yourself and Your Life's Path in 5 Minutes a Day is a compilation of the best material (questions, prompts, and exercises) I've published for self-awareness, finding your purpose, and developing a direction in life. Book 1: Best-selling Self-Discovery Journal: Find Who You Are and What You Want in All Areas of Life. In this book, you will: Discover what an abandoned, mentally-challenged boy taught me about letting go of the past. Apply secrets techniques used by life coaches to create a healthy sense of identity, even if you suffer from anxiety, depression, or low self-esteem. Elaborate on questions designed to help you and master every area of your life. Book 2: Inspirational Find Your Passion: The Ultimate Workbook. In this book, you will: Discover techniques celebrities like Oprah use to make sure they're living with passion and purpose. Discover the secrets success psychologists know (but mainstream won't tell you) for self-knowledge and self-mastery. Use an unorthodox but simple way to find your passion and discover the legacy you want to leave behind (Hint: It's not a vocational career test). Book 3: Thought-provoking Coaching Questions: 200 Breakthrough Questions for Career and Business Mastery. In this book, you will: Apply principles from an old self-help book to think big and grow your career or business likewise. Discover a tailored-for-you approach (that no one talks about) for creating the perfect work-life balance. Discover the types of questions that successful entrepreneurs and CEOs ask themselves that the average worker doesn't. These books carry the questions that will bring to surface the answers that you need. No boring moments- just thought-provoking questions and prompts to bring out life-changing answers. Are you ready to begin creating a life of your own design? Click the "Add to Cart" button and get your copy today!
